Thursday 14th February 2019

Dear all at the University of Lincoln,

I am writing to you on behalf of all Year 6 at Westgate Academy. On March 30th 2019, millions will turn off their lights from 8:30pm-9:30pm, as well as raising awareness of climate change. This is called Earth Hour and I politely request that you join in with more than 185 countries and 2.4 million individuals; it will make a difference!

As you should already know, global warming is having a disastrous effect on our environment. It is a high-risk issue to Earth: it is causing the ice caps to melt; the sea levels to rise. If our generation does not have our planet today, there may not be a tomorrow.

Climate change is a life-changing problem. In the future, Europe (mostly mainland Europe) could become a barren desert! Most life would become extinct.

possibly, including us - human. You wouldn't want that, would you? Already, forest fires are destroying whole ecosystems! Whole forests gone! Soon, the Amazon Rainforest could be known as the Amazon Desert - all because of our selfish needs and greed!

So, how will taking part affect you? If you take part in Earth Hour, more people will hear about the terrible effect of global warming! Also, if you all turn your lights off, you will save a bit of money that can possibly go to your already brilliant curriculum. It can and will save the ocean's increasing acid levels, as well as the decreasing crop yields around the globe. I have already mentioned that the ice caps are melting, you wouldn't want horrible floods to be caused by us? Whole countries will be engulfed by water from the ice caps it has already happened in Bangladesh! The saddest thing is that it's caused by us, and we are doing nothing to stop it! We're like a student not doing their homework; a runner not trying to run.

So, the world will be partly saved by you - the University of Lincoln - if you participate. Planet

Earth is our home to love, and that is what we must do! In the race to change our planet, climate change is much faster than we are. Join Earth Hour, you won't regret it.

Yours sincerely,

# Connect2Earth.
